Brief about Bangladesh Pharmaceutical Industry:

Bangladesh is undoubtedly one of the fastest growing pharma-economy in global markets, and the momentum of growth further accelerated by 17 years long extension till year 2033 by WTO / TRIPs to continue the patented pharma formulations. Such phenomenal coincidence has generated huge requirements for the domestic pharmaceutical industry in multifold and multi-aspects, which include; upgradations and expansions of the existing manufacturing facilities. These have created demand for the machineries for large volume capacity to cater larger area of the global for pharma formulation supplies.

Bangladesh pharmaceutical industry is growing at more than 18% annual growth rate and emerging as global hub for the Contract Manufacturing for the pharmaceutical formulations. With exports to more than 125 countries across the world, two companies from Bangladesh acquired the US-FDA Certifications apart from FDA Certifications from MHRA, MAFDAC, Ghana, etc. API Park near Dhaka is all set to equip their manufacturing facilities, and soon 45+ units are about to start the API manufacturing.
